Saudi Premium Residency holder | Saudi Council of Engineers member

PROFESSIONAL SUMMARY

Industrial Engineering graduate (Alfaisal University, 2026) working in plastics manufacturing on PVC and HDPE pipe, trunking and injection-molded products. Builds Excel/VBA tools for quality control and material tracking, writes specifications and feasibility studies, and traces production faults to their root cause. ISO 9001:2015 Internal Auditor and Lean Six Sigma Yellow Belt.

PROFESSIONAL EXPERIENCE

Al Takhassosy Plastic Factory — Al Kharj Industrial City, Saudi Arabia

Production & Quality Engineer — Aug 2026 – Present

- Run daily QC checks across five production sections and wrote the H1 2026 pipe-section report for management.
- Wrote trunking and spiral hose spec sheets from weighed sizes and bundles, and added lighter low-price variants.
- Prepared a feasibility study for HDPE multi-duct fibre pipe and reviewed National Grid SA spec 23-TMSS-01 for PVC conduit.
- Designed production-order forms for each division with an archive, replacing handwritten slips to supervisors.
- Planned a warehouse bay layout for PVC rigid pipe (U-Type and R-Type zones by size) and sourced racking suppliers.
- Traced machine faults with maintenance, such as rejects caused by a rusted, unbalanced machine base.

Industrial Engineering Intern — Jun 2026 – Aug 2026

- 60-day rotation across all five sections: weight, dimension and pressure checks, defect tracking, mold changeovers.
- Wrote corrective action reports, observed an external audit, and compiled a 29-page trainee guide to the factory.

Production Support Trainee (Part-Time) — daily team coordination and floor safety — Jun 2024 – Aug 2024

Other Experience — Riyadh, Saudi Arabia

Treasury & Sponsorship Team Member — Alfaisal University — Nov 2024 – Nov 2025

- Assisted in negotiating sponsorship agreements with local businesses for student activities.

Sales Associate (Part-Time) — Perfectlypressed.co — Jan 2024 – Jun 2024

PROJECTS

Daily QC Workbook | Excel, VBA — *Al Takhassosy Plastic Factory* — View

- Multi-sheet workbook for five sections with automatic spec lookup, PASS/FAIL tolerance checks and a daily QC schedule.

Material Mix Log | Excel — *Al Takhassosy Plastic Factory* — View

- Daily HDPE, LDPE, LLDPE, recycle and masterbatch mixes for nine pipe products, with monthly use of each material.

Purchase Approval Workflow | Excel, VBA — *Al Takhassosy Plastic Factory* — View

- Proposed a shared workbook routing requests from Purchasing to GM to Finance, with logged decisions (under review).

PepsiCo Bottling Line Work Study | IE 307 Work System Analysis — *Alfaisal University* — View

- Mapped the PET, NRB and can lines at a PepsiCo bottling plant in Riyadh with flow process charts and a fishbone diagram.
- Found that a full changeover idles a 120,000 units/hour line for about 4 hours, and proposed SMED, automated changeover and clean-in-place pre-flushing to cut it to 1.5 hours (availability 83% to 94%).

VeriGate | IoT Receiving Device (Arduino, RFID) — *Alfaisal University* — View

- Co-built an Arduino RFID and load-cell device that verifies drivers and shipments at the gate and logs approved records.

HydraCap | Bottle Cap with Medication Compartment (SolidWorks) — *Alfaisal University* — View

- Co-developed the concept: concept generation, design evaluation, material selection and prototyping analysis.

EDUCATION

Bachelor of Industrial Engineering — Alfaisal University, Riyadh, Saudi Arabia — 2026

CERTIFICATIONS & MEMBERSHIPS

ISO 9001:2015 Internal Auditor — Pioneers of Quality Management Consulting, Dec 2024
Lean Six Sigma Yellow Belt — KnowWare International, Mar 2026 | **Saudi Council of Engineers (SCE)** — Member, 2026

SKILLS & LANGUAGES

Technical: Microsoft Excel (VBA, advanced formulas), SolidWorks, MATLAB, Arduino, IoT, RFID, Microsoft Office, Claude AI
Manufacturing & Quality: Quality Control, ISO 9001 Auditing, Lean Six Sigma, SMED, Flow Process Charts, Root Cause Analysis, Corrective Action, Product Specifications, PVC & HDPE Extrusion, Injection Molding, Feasibility Studies, Process Improvement, Prototyping
Professional: Project Management, Cross-Functional Coordination, Negotiation, Technical Report Writing (Arabic & English), Problem Solving, Leadership
Languages: Arabic (Native), English (C1 Advanced)
